

NPP NINE-POINT PLAN (LAHIDO)

2027–2031

Our Pledge to the Gambian People

The National People's Party presents this Nine-Point Plan (Lahido) as a clear and practical guide to our priorities for the period 2027–2031.

1. Good Governance and Public Service Delivery

Government must serve the people. The NPP will strengthen transparency, fight corruption, enforce accountability, and improve public services so that citizens receive fair, timely, and respectful treatment from all state institutions.

2. National Security, Justice, and the Rule of Law

Peace and justice are the foundation of freedom and development.

The NPP will maintain national stability, further professionalize security services, strengthen the justice system, protect human rights, and ensure that the rule of law keeps communities safe.

3. Education, Skills, and Human Capital Development

Education is the foundation of opportunity. The NPP will invest in quality education, practical skills, and lifelong learning, ensuring that children, youth, and adults are prepared for work, leadership, and responsible citizenship.

4. Health, Social Protection, and Family Welfare

Every Gambian deserves access to healthcare and support in times of need.

The NPP will strengthen hospitals and community health services, expand health insurance, and protect vulnerable households, including women, children, older persons, and persons with disabilities.

5. Agriculture, Food Security, and Rural Development

Food security is national security. The NPP will support farmers, increase local food production, reduce food imports, and grow agribusiness so that rural communities prosper and the nation feeds itself.

6. Energy, Infrastructure, Housing, and Basic Services

Development requires strong foundations. The NPP will continue expanding electricity access, improving roads and water supply, promoting renewable energy, and increasing affordable housing through well-planned communities.

7. Youth Empowerment, Women's Empowerment, and Children's Rights

Empowering people strengthens the nation. The NPP will invest in skills training, apprenticeships, entrepreneurship, and leadership pathways for youth, while advancing women's economic empowerment, gender equality, and the protection and welfare of children.

8. ICT and Digital Transformation

Technology is a driver of opportunity and efficiency. The NPP will expand digital infrastructure, modernize government services, promote digital skills, and support innovation so that technology improves daily life, education, health, and business growth.

9. Environment, Climate Change, and Natural Resources

Protecting the environment protects the future. The NPP will strengthen climate resilience, protect natural resources, promote renewable energy, support green jobs, and safeguard livelihoods for present and future generations.

ONE PLAN, ONE DIRECTION

While each priority is presented separately, they form one integrated national agenda:

- Jobs are created through agriculture, infrastructure, energy, ICT, tourism, and youth programs
- Digital tools improve governance, education, health, and service delivery
- Environmental protection strengthens agriculture, tourism, and community resilience
- Women and youth empowerment cut across all sectors

Progress in one area reinforces progress in others.

OUR COMMITMENT (2027–2031)

Under the leadership of H.E. President Adama Barrow, Secretary General and Party Leader of the NPP, we commit to:

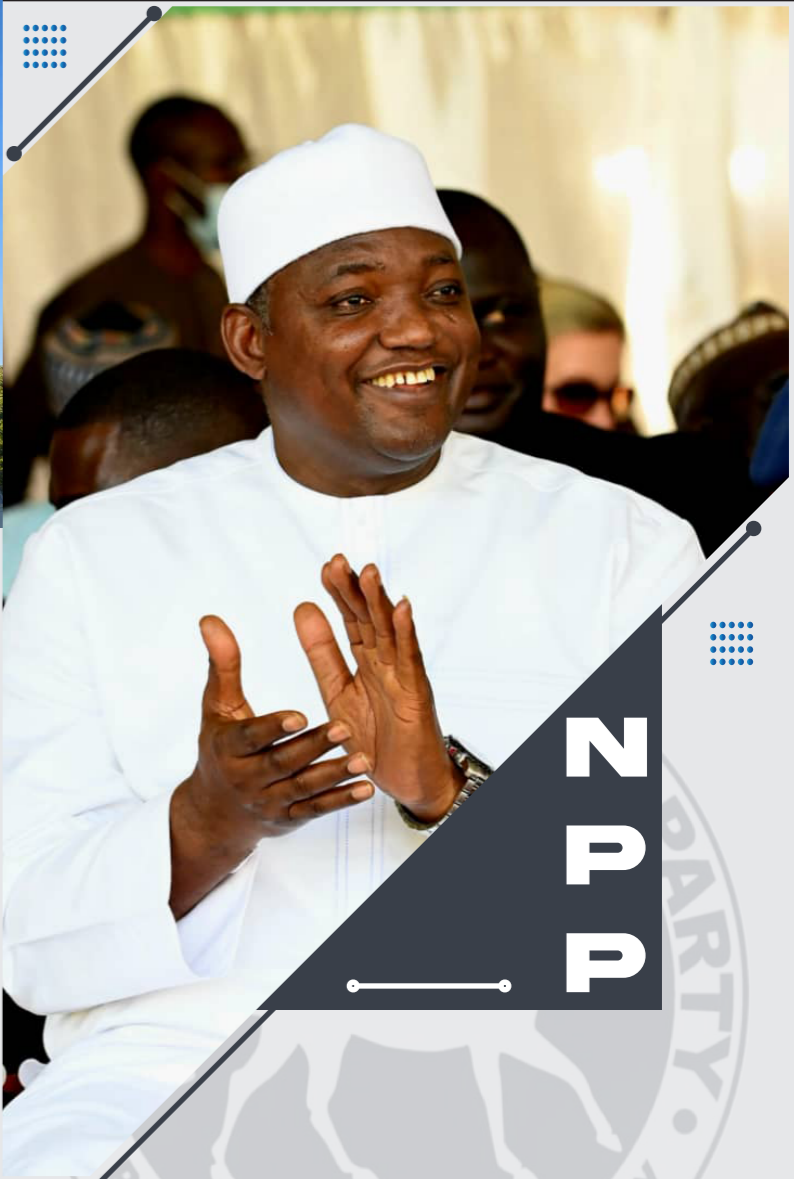

- Honest and accountable leadership
- Strong institutions that deliver results
- Opportunities for youth and women
- Protection of children and vulnerable groups
- Peace, unity, and national stability
- Sustainable development for today and tomorrow

Together, we will continue building:

One Gambia · One People · One Future
